One image per sample: how much changes after 1 or 5 frames?
Lag-5 P5 example
trajectory 10, frame 102
t: angle -18.5°
t + 1: angle -18.9°
t + 5: angle -17.4°
|I(t+5) - I(t)|
bob displacement 0.48 px
Lag-5 P50 example
trajectory 6, frame 306
t: angle -28.9°
t + 1: angle -27.8°
t + 5: angle -19.4°
|I(t+5) - I(t)|
bob displacement 4.39 px
Lag-5 P95 example
trajectory 23, frame 146
t: angle -6.6°
t + 1: angle -12.1°
t + 5: angle -31.4°
|I(t+5) - I(t)|
bob displacement 11.37 px
L1a, fixed L. Examples selected from training pairs; each panel is one 64×64 image. Noise augmentation excluded.
